Education

GF'S Godavari College of Engineering, Diploma in Computer Engineering Sept 2021 – May 2024

- Overall Percentage: 87.77%
 - **Relevant Coursework:** Software Engineering, Database Management Systems, Web Technologies, Data Structures
- R.C. Patel Institute of Technology**, B.Tech in Computer Engineering Sept 2024 – Pursuing

- Current CGPA: 8.47/10
- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Database Management Systems

Professional Experience

SDE Intern – Tagowls Feb 2026 – May 2026

- Built 8+ reusable React components with responsive design; integrated 12+ REST APIs reducing latency from 1.5s to 150ms.
- Fixed 25+ critical bugs improving application stability from 96.2% to 99.5% uptime and reducing crashes by 73%.
- Implemented Jest unit tests achieving 88% code coverage in Agile environment (4 developers, bi-weekly sprints).

Teaching – Nodevember 3.0 Nov 2025

- Led backend development workshop for 100+ classmates covering MERN stack, API design patterns, and security.
- Designed hands-on curriculum teaching MongoDB schema modeling, Cloudinary integration, JWT authentication, middleware, and Postman API validation.
- Demonstrated end-to-end BookStore backend implementation achieving 95% participant understanding

Backend Developer – Kartar Groups Oct 2025

- Architected 8 RESTful API endpoints handling daily transactions; designed MongoDB schema with 7+ collections reducing query time by 35%.
- Optimized API response from 800ms to 180ms ; implemented JWT authentication with refresh tokens.
- Supported 50+ concurrent users with secure backend workflows and optimized database indexing.

Technical Projects

NetReach – AI-Powered Cold Email SaaS Platform GitHub

- Engineered an AI-powered cold email SaaS platform with automated prospect research, personalized outreach generation, and multi-model LLM orchestration using OpenRouter and Tavily APIs.
- Architected end-to-end email infrastructure supporting Gmail/Outlook OAuth, campaign automation, recipient segmentation, scheduling, and real-time open, click, and reply tracking.
- Developed and deployed 10+ production-ready features using Next.js, TypeScript, Node.js, PostgreSQL, Redis.

Architect AI – AI-Driven Task Management Application GitHub | Live Demo

- Scaled React Native app with Google Gemini AI achieving 95% voice-to-task accuracy and speech-to-text.
- Implemented AI-powered task prioritization improving completion rate by 45% with personalized recommendations and smart organization.
- Built scalable Node.js backend, data synchronization, and push notification system (78% engagement).

TagOwls – Creator Commerce Marketplace GitHub | Live Demo

- Developed the creator-side frontend using Next.js for product promotion and earnings tracking.
- Implemented authentication, creator dashboards, and product management workflows for platform interaction.
- Integrated payment gateway and cashback reward systems to enhance creator-brand collaborations.

Technical Skills

Languages: JavaScript (Advanced), Java (Intermediate), Python (Intermediate), C (Advanced)

Frontend Development: React.js, React Native, Next.js, Tailwind CSS, Redux, ShadCN UI, Framer Motion.

Backend Development: Node.js, Express.js, RESTful APIs, JWT Authentication, Database Design, API Security.

Database & Tools: MongoDB, SQL, Database Indexing, Query Optimization, Firebase, Redis, Postman, Git/GitHub.

Certifications & Achievements

Certifications: Backend Developer – Kartar Groups (Oct 2025) | Teaching Certificate – Nodevember 3.0 (Nov 2024) | MongoDB University Certification | Postman API Fundamentals Student Expert

Coding Profiles: Solved 70+ DSA problems on **LeetCode** and 100+ problems on **CodeChef** | Certified in Java, SQL, Python, and Problem Solving

Hackathons: Smart India Hackathon (SIH), Sandip Foundation Innovo, and SSGMCE Innovo
